

# RESEARCH IN ACROMEGALY & GEP-NETS

OPEN Health, a healthcare research company, is conducting interviews to explore **treatment experiences of people living with gastroenteropancreatic neuroendocrine tumors (GEP-NETs) or acromegaly** to understand how people's experiences could be improved in the future.

## WE ARE LOOKING FOR PARTICIPANTS IN THE UK WHO:

- Have been diagnosed with GEP-NETs or acromegaly
- Are at least 18 years old
- Have received injections with both **Lanreotide Ipsen®** and **Lanreotide Advanz Pharma®** syringes over the course of their treatment
- Have received a minimum of two injections with each syringe
- Have received their most recent injection of **Lanreotide Advanz Pharma®** within the past 12 months

## RESEARCH STEPS

### GET IN TOUCH

Contact us if you'd like to take part or request more information

### CONFIRM ELIGIBILITY

We will arrange a short telephone or online call to ask some questions to confirm you are eligible

### PROVIDE CONSENT

If you are eligible, we will share important information about the research and request your consent to participate

### ATTEND INTERVIEW

We will arrange your telephone or online interview if you consent to take part

To register your interest and/or find out more about this research:

**Email us at: [study@openhealthgroup.com](mailto:study@openhealthgroup.com)**

Participants may withdraw from the research at any time without giving a reason.

**Participants who complete the interview will receive a payment of £75 for their time.**
